Finally, the primary provider is responsible for demonstrating leadership in the community. This Report's description of a primary provider seems as relevant today as it was when it was written. In 1994, the Institute of Medicine's assessment of primary care added the responsibility of family and community integration of care to the Millis Report description. Without question there are many

I was a Medical Student in 1966 when the Millis Report on the training of the generalist physician was published, defining the concept of primary care. According to the Report, the primary provider has four major responsibilities or roles. The first role is that of initial contact care of the undifferentiated patient. The second is to provide

Family-oriented primary care has moved from doctor-controlled to patient-centred consultations, with a greater emphasis on collaboration. The systemic framework uniquely lends itself to this shift in emphasis, as it views the delivery of care in social rather than merely medical terms. There is now a strong evidence base for the efficacy of systemic approaches in managing many different types

Despite a well-publicized shift away from the traditional family structure, the family remains the most basic relational unit in society and the physician's most potentially. A family orientation in health care can provide a wider understanding of illness and a broader range of solutions than the classic biomedical model. FAMILY-ORIENTED
