Great Whales, John Bannister, 9780643096196  
Seven Great Whales are found in the coastal waters surrounding Australia. These include six of the largest baleen whales blue whale, fin whale, humpback whale, sei whale, Bryde's whale and southern right whale and the sperm whale, the largest toothed whale. This book provides a detailed account of these extraordinary mammals.

Great whales | John Bannister - Andrew Isles Natural ...

John Bannister is a leading expert on the large whales of southern waters and has published on Sperm, Humpbacked and right whales. Seven 'great whales' are found in Australian coastal waters including six of the large baleen whales (Blue whale, Fin whale, Humpback whale, Sei whale, Bryde's whale and Southern right whale) and the largest toothed whale (Sperm whale).

Great Whales - PDF Free Download - epdf.tips

Strictly speaking the great whales comprise the six baleen whales (blue, fin, sei, Bryde's, humpback, southern right) and the one toothed whale, the sperm whale. But I have added another the minke not quite a great whale in the traditional sense, but important enough in the Australian context to be included here.

**Great Whales - Read Online - scribd.com**

Seven Great Whales are found in the coastal waters surrounding Australia. These include six of the largest baleen whales blue whale, fin whale, humpback whale, sei whale, Bryde's whale and southern right whale and the sperm whale, the largest toothed whale. This book provides a detailed account of these extraordinary mammals.

**Right whale - Wikipedia**

Right whales or black whales are three species of large baleen whales of the genus *Eubalaena*: the North Atlantic right whale, the North Pacific right whale and the Southern right whale. They are classified in the family Balaenidae with the bowhead whale. Right whales have rotund bodies with arching rostrums, V-shaped blowholes and dark gray or black skin. The most distinguishing feature of a right whale is the rough patches of skin on its head, which appear white due to parasitism by whale lice.

**Bryde's whale - Wikipedia**

The Bryde's whale is a baleen whale, more specifically a rorqual belonging to the same group as blue whales and humpback whales. It has twin blowholes with a low splashguard to the front. It has twin blowholes with a low splashguard to the front.
