Imaging Radar for Resources Surveys - Kobo.com

Radar imagery presents the resource scientist with a new imaging technique that has to be understood and used, a technique which, although in many respects still in its infancy, has considerable applications potential for resources studies. Remote sensing now forms an element in study courses in the earth sciences in many major universities and a number of universities offer specialist post-graduate courses in remote sensing. Nevertheless there are a large number of earth scientists already

Imaging radar for resources surveys. - CAB Direct

The appearance of this book on the market at the present time reflects the use in recent years of all-weather radar systems which have been providing a new view of the earth, both from aircraft and from space. The book's main objective therefore is to introduce earth and environmental scientists to the potential of such imaging radar systems.
