Mammographic image reject rate analysis and cause A ...

Mammography is used as a first-line investigation in the detection of breast cancer and imaging is required to be of optimal quality and achieved without adverse effects on the health of individuals. Repeated images come at a cost in terms of radiation dose, discomfort to clients and unnecessary financial burdens. No studies investigating Mammographic Image Analysis Society (MIAS) database v1.21

The Mammographic Image Analysis Society database of digital mammograms (v1.21). Contains the original 322 images (161 pairs) at 50 micron resolution in "Portable Gray Map" (PGM) format and associated truth data. Mammographic image analysis - ScienceDirect

Database One of the most notable aspects of all previous work on mammographic image analysis is the failure of algorithms to perform equally well between different databases. The work we outline in this section has worked identically on a number of different calibrated image databases collected over the last 5 years. In all our databases we store with each image details of X-ray tube voltage.

The mini-MIAS database of mammograms (J Suckling et al (1994): The Mammographic Image Analysis Society Digital Mammogram Database Excerpta Medica: International Congress Series 1069 pp375-378. International Congress Series 1069 pp375-378.
